### Type CGU-Kit Guard

Safer than metal guards, these rugged OSHA-compliant polyethylene guards are smooth-edged, electrically nonconductive, and have no mesh for fingers or tools to poke through. They come with warning labels and are safety orange in color (no painting required), so they're easy to spot. Perfect for corrosive and outdoor environments, guards have Type 304 stainless steel hardware and are chemical, corrosion, UV, and impact resistant. They feature OSHA-required enhanced end-caps They meet OSHA standard 29 CFR 1910.219 for rotating machinery. Each guard comes unassembled, allowing you to custom fit your application.
