Adjustable Barrel Guard

Recommendations:

- Uniguard Custom Adjustable Barrel Guards have been created to allow you to utilize our standard barrel guard features to create unique guard opportunities for non-ANSI pump style equipment. Customers have mounted these to motor end bells, C-face motors or bearing caps.

Pros:

- Utilizing existing barrel diameter guards for custom application.
- Slotted cover is optional for heat dissipation.
- Inspection windows are easily installed for equipment maintenance or visual inspection.
- Alternative OSHA compliant guard when obstruction exist making it difficult to mount guards to the equipment foundation.

Cons:

- Maintenance will need to create a mechanism to mount the COG.
